

# Live Haul Tank

*Our live haul tanks are our premier product for transporting fish between locations. The tanks are available in a variety of sizes to best fit your needs.*

- Double-wall insulated aluminum
- Standard 8" x 12" rectangular dump gate with camlock and ringlock options
- Hundreds of standard tank sizes from 125 gallons to 1,180 gallons

**AQUANEERING**  
INCORPORATED

*Superior Water Quality. Because your research depends on it.*

Our live haul transport tanks are the superior choice for transporting your fish. Made from dual walled aluminum and completely insulated, these tanks have set the standard for transporting fish in the U.S. and are the most rugged tanks available on the market today. Our tank lids are designed with ease of use in mind and are built with leaktight seals that won't slam shut. With both standard and custom sizes available, we look forward to helping you transport your fish.
